

AND EL PASO COUNTY NEWS.

Whole No. 264

*[Illegible text]*

California is preparing to make a grand display at the Paris Exposition. The aggregate space assigned to the state is 1,000,000 square feet, and the estimated weight of the exhibit is 500 tons. The exhibition of minerals will be the finest the world has ever seen. A total of 1,000,000 square feet at the base of the exhibit, nearly twenty feet high, will represent the 7,000,000 cubic inches of

PLAIN TALK TO A GIRL

not to be trusted, however fine you may look in the evening. No matter how humble your room may be, there are eight things it should contain, viz. a mirror, washstand, soap, towel, comb, hair, nail, and tooth brushes. These are just as essential as your breakfast, bed, and bath, and you should make good use of them.

not only make a great mistake, commit a sin of omission. Look tidily the morning, and after the dinner is over improve your toi et. **Wash** the rule of your daily life to "dress up" the afternoon. Your dress may or may not be anything better than calico, with a ribbon or flower, or some bit

THE LONDON PRESS.

now averages 230,000. The *London Times* spends more than \$500,000 in paper, and for its printing \$20,000. Each advertising company in this journal, and it averages nine per cent of them, brings in a revenue of \$100,000. The outlay in foreign correspondence amounts to about \$100,000.

No pains or expense is spared by the great London dailies to procure the latest information from all parts of the world. Their editorial and correspon-

NEVADA.

The Eureka Consolidated Mining Company, of Eureka District and County, Nevada, pays the largest monthly dividend, per share \$3, of any of the mines in the country. Its last dividend of that amount, in the year 1900,

making a sum total up to December 1877, of \$1,600,000 paid out to stockholders, upon 50,000 shares, of the value of \$100 each. The assessment upon the shares of this company had been but \$2 each, or in the aggregate \$100,000. The latest rates of the stock in San Francisco, were at \$37.00

out \$1,850,000, while as much as 800,000 may be reasonably expected dividends for the twelve months ending with November 30, 1878. This may confidently anticipated, from the amount and quality of the ore already processed, and the present monthly buoyant yield—that for October having been \$427,400, and that for November \$440,000.

months ending with that month.

**Readers, Are you Insured?**

If not, would be pleased to have you investigate the standing and rates of

ROUND ABOUT DEER STATE.

About 75,000 head of cattle were shipped from Colorado in 1877.

The miners of Colorado have been holding a meeting in Denver and are taking measures to ship four to the East.

Accounts from Silverton of encouraging work among the mines; of the weather, much snow, gaiety, and dancing; no word for the doctors.

Wilson Waddingham has received a patent to his New Mexican ranch of 352,000 acres, embracing a considerable portion of the ninety mile desert.

The road between Colorado Springs and the California Guano Mining District, over the Weston Pass, continues to be in a very good state; in fact better than some two months ago.

The Boston Mining Co., at St. John, Summit County, are employing twenty-five men, under the management of Mr. W. P. G. Hayward during the absence of Col. Wm. L. Caneer.

A movement is on foot in Saguaire to consolidate the three adjoining school districts to the town, forming an independent district, and have a large school building erected in the town.

They are having a singing and coasting at Lake City, and the mines in the vicinity are being worked with good results, preparations are being made for a great many improvements in the spring.

Forty-four million eight hundred and thirty-four thousand dollars was the amount of cash invested in mines in Colorado for the year ending Dec. 31, 1877, of this the largest amount in any one company was \$5,000,000.

Prof. C. V. Riley, Cyrus Thomas and A. S. Packard, who have been engaged in the study of the Rocky Mountain insect, have made their investigations of so much value to the public generally that we may rest assured of an abatement of this evil.

Under County produced \$250,000, \$50,000 was shipped from Rosita, \$200,000 obtained \$91,000—\$14,500 in gold and \$76,500 in silver; there was shipped last \$100,000. This new County embraces all that mining section heretofore in Fremont County.

The train that brought Mr. Dunn from Topeka, at Topeka at 3:15 in the afternoon stopping half an hour at Newton, Kansas, or supper, and other places or water and coal, arrived at Pueblo at 7:30 on Friday morning. The distance from Newton to Pueblo is five hundred and sixty-eight miles.

R. Newe's ranch, on Trout Creek, about eighty miles from Colorado Springs, on the Leavenworth road, was burned on Sunday morning, the 6th inst. There was saved from the flames, the United States mail, one oil lantern, and an armful of empty cigar boxes. Loss, about \$2,200.

Our January first review set the outside world to talking of Lake City. Our more earnest than ever, John A. Sikes, Lake City is accorded the banner of the greatest growth and progress during 1877 of any town in the State or the West. In fact, we have yet to hear of a town in the United States that can make as good a showing.—Silver World.

Mr. Wm. West has received a letter from Messrs. F. H. Day & Peter, of Topeka, Kansas, saying that their agent will be in Lake City about the 25th inst., to examine the Green smelter, to investigate the mineral resources of the country and to look into the whole subject of the reduction of ores and the inducements offered to investors or investments here.—Silver World.

Mr. William Faux, says the Danville (Penn.) Record, arrived in Danville on Wednesday. He came direct from Pueblo, Co. Colorado. He is a remarkable man, and seems in good spirits in relation to the future of his mining mill, which he expects to go into operation in the first part of February. He is much pleased with the climate and the people of Pueblo, and reports the same of the Danville boys.

The Denver Tribune says that Adjutant General Roe has notified the O'Leary citizens who desire to organize two infantry companies under the State law, that they may proceed with their enlistments. He has authorized the County Clerk of O'Leary County to muster in the men, and as soon as he is in order, of the organization of the companies, he will forward one hundred stand of arms for their use.

The advertising case of which Mr. Stradbury, of Colorado Springs, was taking advertisements last summer has arrived and been placed in the post office by J. C. Johnson. It is a handsome and substantial piece of furniture, of solid walnut, carved and highly ornamented, and besides being an ornament to the office, will prove of great convenience to people who have no other place to write. It is fitted with four inkstands and a calendar, and is in all respects equal to anything of the character found in Eastern offices or hotels. The advertisements are snowy and are the specimens of workmanship.—Silver World.

Below we give the value of property by counties in the State:

|             |                 |
|-------------|-----------------|
| Adams       | \$10,267,931.00 |
| Bent        | 1,950,741.96    |
| Boulder     | 3,155,260.00    |
| Clear Creek | 2,120,041.00    |
| Chaffee     | 123,227.25      |
| Custer      | 59,845.00       |
| Cosilla     | 229,870.00      |
| Golden      | 868,354.61      |
| El Paso     | 1,149,795.00    |
| Fremont     | 3,150,850.00    |

| Huerfano    | 155,722.00      |
| Huerfano    | 18,002.75       |
| Huerfano    | 2,295,580.00    |

RICH STRIKES AT ROSITA.

A couple of very important mineral discoveries were made near Rosita a few days ago. The first was by Vinn and Nugent, who found a very rich vein of silver-bearing ore, with a crevice of from three to four feet, containing a pay-streak of three inches that is five with streaks and grains of native silver. Assays from it run as high as \$14,000 per ton. The value of other portions of the crevice matter is not reported. Subsequently "Bry" Way and traces out the lead and cadmium extension, which promises to be equally rich. The result is great excitement and renewed activity in and about Rosita. The location of these new mines is about three miles north-west from the town and outside of the forty-nine mile. Rosita is upon a belt of porphyry, which is about three miles wide and fifteen miles long. At the mines ounce hereof, that amount to anything, are within that belt, which extends from north-east to south-west. The new discovery is a mile or more outside of that limit, and in granite. This act is esteemed a very significant one, and stimulates prospecting in a new field.—Denver News.

COLORADO.

Though I did not see the letter referred to by your correspondent, "S.," concerning the climatic effects of Colorado upon persons suffering with pulmonary and throat diseases, yet I cannot allow his statements to go unchallenged. The opinions given of this country as a sanitarium are almost as great in number as the persons who write about it; each writes as he happens to be influenced at the time. Those who over a bright sky, warm sunshine, grandeur of scenery, and a free, open air, over to him it with a rapturous outburst, while others, who have a less appreciative mind, enshrine it in a maudlin poem, asserting it to be a country unfit for invalids.

There is another class of writers, namely, those who have lived but a few months in the country. They, after having gained a little information from the "four-timers," ranchmen, and miners, feel themselves qualified to give their conclusions to the public, scarcely stopping to enquire how far they may be right. There is again a third class, those who have spent the little time they have lived in the country wholly in one place. They, having derived benefit while living there, at once exclaim it to the skies, to the discomfiture of every other town. A those who form the third class look upon the towns of Colorado through the same telescope, but through a different lens. The admirer of Denver, after obtaining a huge magnifying glass, plants himself upon Canon City to make observations. He is, of course, as he gazes through the little end of his telescope, lost in wonder and delight, or he has resolved to make a great deal of this city. But this is not the case when, from the same place, he takes his observations of the surrounding towns, or he has but his eye at the big end, and now recognizes the most insignificant of places.

Those who intend going to Colorado must, between the good and bad reports, take a middle opinion, and they will thereby save themselves much annoyance and disappointment.

During a three years' residence in Colorado, I visited and spent an entire time in both the mountain and valley towns, including Central, Cañon, Golden, Denver, Colorado Springs, Manitou, Pueblo, and Canon City, and have thus had an opportunity of judging of the special advantages of these places; but it is of Colorado Springs I wish to speak. It is true Canon City is a gem in the State, but as it lies at the very base of the mountains, among the foot hills, it is not any better than Manitou for duration of sunshine, and not as good as Colorado Springs, the latter being five miles from the mountains.

A little has much to do with giving relief to consumptive and asthmatic, and Colorado Springs has the advantage over Canon City of nearly two thousand feet. The advantage of receding from the winds in winter which the latter has over the former is more than counteracted by the oppressive heat in summer, it being so shut in as to exclude the cool breezes from entering unless swooped down by one of Colorado's "gentle zephyrs."

Colorado Springs is a beautiful situation on a plateau near enough to the mountains to be refreshed by the mountain breezes of summer, and far enough to permit the rays of an afternoon's sun in winter to fall upon it. It is a city of the north as well as of the south, a city of the mountains and of the plains, and those of the east by sight, some five miles distant. Manitou, with its mineral springs and the notes, is near, so that a change can be had by a few miles' drive.

Peaceful scenery and surrounding influences add their share as to the cure of pulmonary disease, and Colorado Springs possesses these in an eminent degree. There is the advantage of good society, fine, genial people, and of beauty and grandeur its craves are not to be surpassed by any town; and, last, but not least, there are cures sufficient to suit every shade of region.

Those who wish to obtain a thorough knowledge of Colorado and its climatic effects, would do well to obtain a copy of an advertisement, written by S. Edwin Smith, of Colorado Springs.—R. W. G. in Montreal Daily Witness.

FEAR, TREAR, AND EVIL.

A Utah man so 30,000 head of cattle last year.

The best sugar wort is at Leeton, Ca., and is using about seventy tons of beet in twenty-four hours.

Our outter and cheese are winning as much favor in the European market as our beer. The exports of these articles for the present business year are nearly double what they were in 1876.

The telephone is working with perfect success by the submarine cable between Dover and Cañon, so that 3000 in England and France can talk to each other as if face to face.

Forty mines of Nevada, California, and Arizona, yielded in gold and silver production for the month of June, 1877, \$4,800,000, and the same mines have produced \$45,756,000 for the eleven months ending with November 30, 1877.

It is claimed that by the canal system, at present in Egypt for the Red Sea, 500,000 acres have been reclaimed from the desert during the last fifteen years, and that 300,000 more are in course of reclamation.

Boots of the thirteenth century are occasionally dug up in London, with sections of cats of the same estive era. The relative positions of the boots and cats show that the ancient were not much better at aiming than we are to-day are.—Danbury News.

Up to 1868 the placer and quartz mines of the Grass Valley District of Nevada County, California, had produced \$24,000,000. Since these two quartz mining companies, the Sutter and the Carbo, have jointly paid dividends to the amount of \$4,314,000.

The Third Port Cartridge Works have been turning out of late some 700,000 cartridges per day. They have supplied Russia with 40,000,000 and Turkey with 70,000,000; they have also secured an order for 80,000,000 from Italy. Russian and Turkish inspecting officers have been working side by side at the factory.

Samuel L. Clemens ("Mark Twain") has assumed editorial charge of the "Hartford Courant," ex-Governor Sawyer's paper. It is stated that Mr. Clemens has bought the "Courant" and intends to make it utter any and everything ever dreamed of in the world of journalism. Even the advertisements are to be semi-numerous.

Col. King's farm on the Rio Grande consists of 160,000 acres, a fenced. It has been growing in wealth since the war with Mexico, and now owns, besides the land, 22,000 horses, 50,000 cows, 75,000 sheep, and 30,000 mules. He employs 300 Mexicans as herders. Most of the land has been fenced at an enormous cost.—Natchez Telephone.

La France, of Paris, announces that in a private meeting of workmen it was resolved to invite the workmen of a national exhibition to participate in the International Exhibition of 1878, as this is the first opportunity they have ever had of a gratuitous exhibition of their productions. The space reserved at the exhibition for the working classes is free of a expense.

There is a copper mine still worked at Ajacete, in Portugal, which is known to have been productive to the ancient Romans, and even at an earlier period. A bronze tablet has been found there, and a celtic page of Roman mining laws—in characters that are regarded as old as the Pagan epoch—regulating the concessions to various contractors.—The Record.

The owners of the Cariboo Mine in Big Cottonwood, in December exhibited in Salt Lake City, says the Salt Lake Tribune, a magnificent piece of agate ore, which was said to contain ninety ounces of silver to the ton. The weight of the specimen is 1640 pounds, and being one of the largest unworked ore in the street, it attracted quite a large crowd in front of Barratt Bros., where it was on exhibition.

The estimate weight of California minerals to be sent to the Paris Exposition is 500 tons. There is to be a pyramidal twenty feet square and nearly seventy feet high, representing the 70,000,000 of cubic inches of gold which have been produced on the Pacific coast. Its equivalent would be a 50 inch cube of gold of a cube of sixteen feet. Surrounding the pyramidal will be fifty cases for the exhibition of the other minerals of the country.—N. S. Tribune.

Between 1868 and 1876 the product of gold and silver in Mexico was \$702,000,000. During the same period American enterprise procured from the territory acquired from Mexico by the Mexican war \$1,389,372,185. In the northern states of Mexico there remains a mineral wealth of enormous value, which, after a few operations of the Spaniards, has scarcely been scratched. Railroads and American enterprise will stir this region into life.—Courier-Journal.

Long's low has five children. One, the eldest, is married and a man of business in Boston; a second is a rising young painter studying abroad. A third, the eldest of the girls, is a rising writer, unencumbered by matrimonial bonds; a fourth is a golden haired, young lady of twenty five, who is very soon united with the son of the third son of the noted Richard Dana, Jr., and Anna is another daughter who leans to the pen. The authors rather than to the pen of the great poet's household.

The biggest tree in California is not in the Yosemite Valley. King's-river Valley, in Fresno County, is 550 feet above the sea, and its walls, which are about 3,000 feet high, are very precipitous. In this valley a new grove of colossal redwood trees has been discovered. One of them reaches a height of 275 feet, and its circumference, as high as a man can reach and pass a tape line around, is a few inches less than 150 feet. This is beyond the measurement of any tree in the Cañaveras grove. The height is estimated at 100 feet, and a part of the top, lying on the ground, is over 100 feet in length.

COLORADO SPRINGS.

Trade Mark Register.

SATURDAY, January 26, 1878.

CROCKERY.

|                               |    |    |    |
